Impacts of Vitamin E on Some Growth, Haematological, Antioxidant Activities and Proximate Compositions of *Clarias Gariepinus* (Burchell, 1822) Under Laboratory Conditions

Published On: May 23, 2026 | Pages: 001 - 008

Author(s): Patrick Ozovehe Samuel*, Hajara Garba and Ramatu Nakordi Ahmed

The assessment of the impacts of vitamin E on the growth, haematological parameters, proximate compositions, and production levels of reduced glutathione (GSH) and Malondialdehyde (MDA) of *Clarias gariepinus* (Burchell, 1822) fingerlings was evaluated for a period of twelve (12) weeks. A total of 300 fish were acclimated for two weeks, during which they were fed twice ...
