Evaluation of Quality Characteristics of Eggs from Local and Improved Guinea Fowls Raised under Semi-intensive Management System

Published On: February 18, 2025 | Pages: 001 - 004

Author(s): Garba S*, Nasiru MH, Muhammed NA and Taiwo KA

This study was conducted to evaluate the quality characteristics of eggs using 160 eggs from local and improved guinea fowls raised under semi-intensive management systems in Wammako Local Government Area of Sokoto State, Nigeria. The two selected guinea fowl flocks were regarded as the treatments, represented as T1 and T2 respectively. Each treatment was replicated 1 ...
