Phenotypic Characterization and Predicting Body Weight of Local Chicken in Doba and Mesala Districts, West Hararghe Zone, Ethiopia

Published On: April 01, 2026 | Pages: 008 - 016

Author(s): Sufiyan Abdi Musa*, Kefelegn Kebede and Yesihak Yusuf

The study was carried out to describe the phenotypic characterization, and body weight prediction from LBM of local chicken ecotypes in the Doba and Mesala districts of the West Hararghe Zone, Oromia Regional State, Ethiopia. A total of 420 adult live chickens of both sexes, 210 chickens (92 male and 118 female) older than 24 weeks from Doba, and 210 chickens (65 male ...
